Dear Team at AIIMS & AIIMS Director ,

1. Global Project - 1 (Inspired from Project Tannu AI)

Integration & Differentiation of World with Material Science & Engineering Approach. (Includes All degrees Text by making them Brick Pay AI)

After officially studying Science & Technology(All Branches) + Biology & Biotechnology(All Branches) + Engineering(All Branches) + Commerce (All Branches) We have reached a common integrated knowledge panel which can make 1 human understand actual knowledge which has been divided since the British Era. (Total divided knowledge across all degrees can at least take 1000 years for each human in the traditional way.) With the help of the internet we are able to achieve faster knowledge gain around the world.

Hence , We proposed project where world all Knowledge has been integrated & compressed in such way so we can deliver in the hand of Indian Population 1.2 crore indian who is not participating national progress apart from first 30 crore. Integrating them with digital identity &

We have invested 30 lakhs INR of our Own & Created Portal called - https://brickpay.in/ , with Brick Pay we can integrate the knowledge & Share it worldwide. We want to pitch it to Education & Health Ministry or Global tech giants like Alphabets in partnership with AIIMS)

2. Global Project - 2 (Artificial Organs Development to save human lives and extend human lives)
Please find attachment - I have worked & marketed requirements of such public sector initiatives with 400+ Scientific communities PAN India. it is my humble request to integrate it

3. Global Project - 3 - Edith ICU-Isolation bed (Deeptech Startup - last 3 pages of Edith Healthcare pitch deck attached here - Project wants to execute with Entrepreneurs like Elon Musk)
Enhanced Physiology Chamber + Hibernation Chamber for Space Travel.

Thanks & Regards,

Edith Healthcare
