THE BRICK BY BRICK ECONOMY

The New Type of Investing

© Edith Robotics Solutions PVT LTD.

Observations/Need - WHY Today/ Problems :

- Techno-solopreneurs high time on venture building. Either for profit or not for profit.

- High time on compliances, fund raising, hiring, recording progress to making billion $.

- After 80 years Peacekeeping & Goodness there is lack of efficient system, bcs we report 1% of the population holds 99% of the wealth, 44% lives without basic necessities, 95% can't bring the change what they want to bring in their lifetime.

- Human Lives value vs Failed method of venture building. (Prbs, Solutions, Scalability, recurring) ✅

TBE

2. Pass the task to right people & Earn money.
(Traceable Network Marketing)

- A SAAS Product includes mentioned key features.

3. Get Human Resource Bidding for compilation of task.
(Best of Demand-supply)

Onboard Team
Team Effort / Money Split

(Teams upto 1 crore people very fast, money split)

Brick by Brick Economy Concept

What is Digital Brick ?

1 . User Profile
Company Profile
Project Profile

List your Task
Task Based-
Micro-crowdfunding/
Investment

(User Writes Next task with fund required that can raised with fractional investors.)

4. Boardseat /Voting Rights for overall Task compilation from all stakeholders

5. Project Valuation Increase & Investors get high returns

- GOAL -
Handling Trillions bricks in 10 Years

TBE

Why customers pay ?

Value Offering

TBE

What We want to Do ?

Enabling, accelerating, educating Professionals/students coming from Non-generational wealth family background on venture building & making them resourceful with Funding, Human resource & recording their progress.

How We are Doing it ?

At Brick Pay - A Digital Platform where,

- We are making outsiders resourceful

  By providing them -

  1. Equity Crowdfunding on their brick by brick/Task by Task progress over Social Media.
  2. Human Resource with short task based association
  3. Recording milestone based progress & showcasing to other with business analytics
  4. Democratising work compilation/decision making satisfaction to all stakeholders
  5. Increasing/Redefining Project Valuation
  6. AI based Education wherever they are stuck in their project building.

On Our Platform Every = Your Next Step = Next call to action = Next Task= Next Milestone = Counted as “Brick” for us
